

Credential Engine Publisher Guide – Entering Required if Available Data

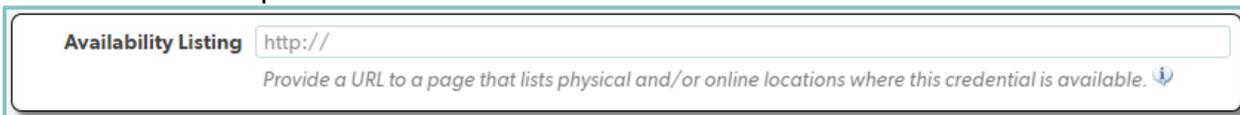

We encourage users to add any additional information relevant to their organization and credential(s). In addition to the minimum data set, there are a set of [Required if Available](#) fields. The below instructions are for publishing the Required if Available data. For further instructions or questions, please contact Scarlett Jeckel sjeckel@credentialengine.org.

Entering Required if Available Credential Data

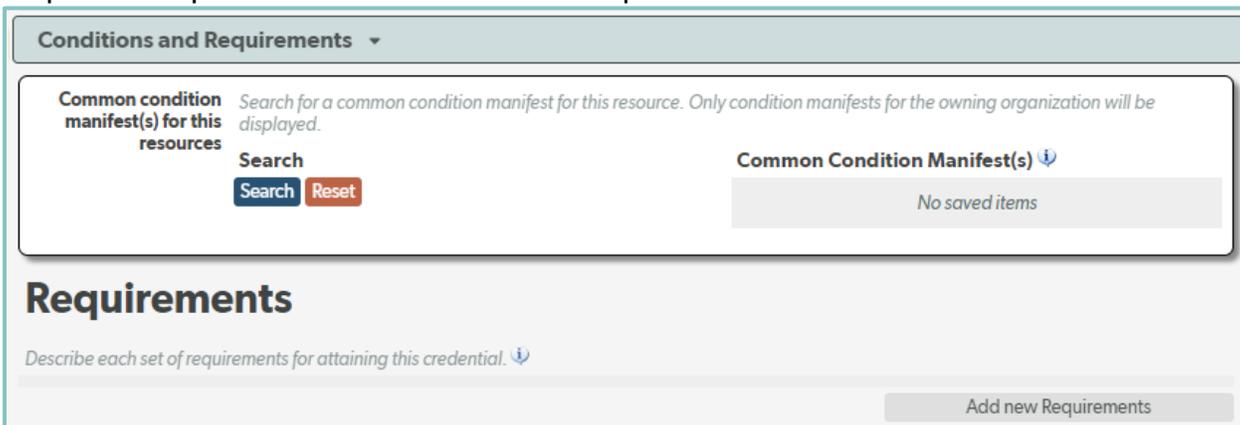

1. If the credential is offered online, insert the URL to where it can be obtained in the 'Available Online At' field.

2. If applicable, insert the URL that lists physical and/or online location of where this credential is available in the 'Availability Listing'. This could be a list of testing centers or a URL that lists campus locations.

3. If there is a requirement or set of requirements for this credential, you'll create a Requirements profile in the 'Conditions and Requirements' tab.

- a. To create a new Requirements profile, select the 'Add new Requirements' button located on the right-hand side of the screen. A new requirements profile will then pop up. If you add a Requirement, you must include a 'Name' and 'Description' to the requirements profile. The name can be something like "Requirements for Degree." You can also add additional information such as years of experience, prerequisites, and required exams. Once you have entered the requirements for this credential, you will then select the 'Save and Continue' button located at the bottom of the profile window.

4. If your credential has third party quality assurance such as accreditation, recognition, or approval you can add it in the “External Third-Party Quality Assurance” tab. To begin, select the “Add New Role” button. *Note: this is for QA directly tied to the credential. For organization QA, you’ll follow this step on the organization’s page.*

External Third Party Quality Assurance ▾

Agent Roles

Describe the relationships this credential has to one or more organizations.

Add New Role

- a. After the “Add New Role” button is selected, the “External Third Party Quality Assurance” pop-out window will appear with options for “Agent Roles” as well as “Acting Organization.” To begin, select all of the options under “Agent Roles” that will adequately represent the relationship between the quality assurance organization and the selected organization.

Agent Roles *Select the type(s) of relationship the selected organization has to this Item. Check all that apply.*

<input type="checkbox"/> Accredited By	<input type="checkbox"/> Recognized By
<input type="checkbox"/> Approved By	<input type="checkbox"/> Regulated By

- b. Once the role is defined, specify the quality assurance organization. To do this, enter the name of the organization in the “Acting Organization” search field and select search to locate the intended quality assurance organization.

Acting Organization *Select the organization that performs the role(s) you selected.*

 Add Organization Reference

- d. If the quality assurance organization is not already in the registry, you may create a reference. To create an organization reference, click on the purple "Add Organization Reference" button. To create the reference, simply add the Name and a URL for the entity being referenced and click the ‘Save and Close’ button.

Create a Reference Entity

Here you can create a reference to an entity such as a credential, or organization etc, rather than a full entity. - where you have 'owner' rights to that organization.
 After saving this profile you will be able to refer to it from other entities, and search for it and add it to other entities as needed.

Name
 Enter a name for this entity.

SubjectWebpage
 Provide the URL to this item.
